TRANSFORMING MANAGEMENT OF YOUR  
SECURITY, SAFETY & ENVIRONMENT

## INCIDENT MANAGEMENT IS CRITICAL *to your* BUSINESS

*A structured approach in dealing with incidents is imperative for proper risk management and compliance. Construction Incident Management System (CIMS) enables businesses to:*

- Centralize incident management.
- Establish workflow process for different types of incidents.
- Automate investigation process and task assignments & reminders.
- Link incident investigations to applicable regulations providing evidence of compliance.
- Track the status of incident investigations.
- Record resolution actions for compliance reporting and audits.
- Securely store sensitive incident documentation and related information.
- Improve risk management through incident tracking and trends.

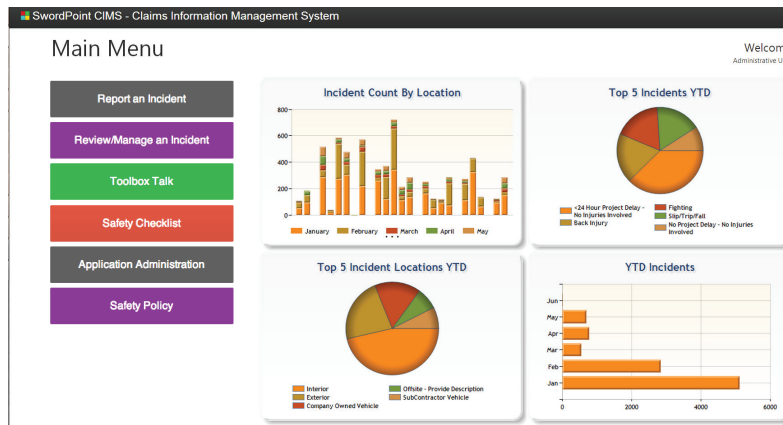

## *Construction Incident Management System (CIMS)*

- Detailed Incident Reporting
- Daily Activity Reports
- Toolbox Talks
- Site Safety Check List
- Safety Policies by Incident
- Regulatory and Client Policy
- OSHA Logs and Workers Comp Reporting
- Quick Reference Guide for Incident Management

# The POWER of DATA

*SwordPoint's analytics dashboard provides you with simple yet valuable overview of activity by project, incident type, timeframe or manager and includes the ability to develop specific reports for your organization. The information allows companies to develop better insight resulting in operational excellence for quality and cost improvement.*

## Features:

- Web-based application for easy implementation & access
- Severity-based notification system for timely communications
- Dashboard evaluation tool for instant analysis
- Ability to file documentation to external entities for compliance
- Capture communications chronology
- Communicate checklists & processes to minimize risk
- Upload photos, video & supporting documentation to incident file

## Benefits:

- Tablet device reporting on secure web-based platform
- Instant access to project data, checklists, policies and incident details
- Real time awareness and email alerts to critical stakeholders
- Confidential database of incidents for inspection and action independent of law enforcement/regulators
- Ability to associate cost to incident
- Brand & employee protection
- Mitigate risk & opportunity for errors
- Reduce claims & litigation
